

Redefining Food Safety & Hygiene Programs

Industry expertise for science-based food safety & hygiene programs

Getting our customers **back to basics** using a science-based approach for hygiene, auditing, and analysis through initiatives guided by leaders in industry, academia and regulatory. Focusing on the food safety system and organizational culture allows us to optimize processes to ensure compliance and program effectiveness.

Consultative Expertise for:

- **Microbiology:** Translating science for the food industry.
- **Food Safety Services:** A science based approach to assess risk.
- **Data Science:** Synergizing the 0's and 1's from internal data with insights from academia to drive change.
- **Behavior Science:** Partnerships with academia to understand how we can best help end-users succeed.
- **Chemistry:** Innovative solutions for healthy, hygienic facilities that drive cost savings.
- **Regulatory:** Expertise and relationships with regulators to deliver best practices aligned with government requirements.
- **Industry Leadership:** Key food safety conference participation and investment to promote thought leadership.

Technical Consulting

Driving Sanitation Results with Data Insights

- Controlled chemical dosing allows us to accurately measure compliance and utilize red flag indicators to identify areas of risk
- Over and Under Consumption analysis by store, district, region to show outliers
- Answer the question: "How much should we be using?"
- Is your meat room sanitized? We can identify noncompliance of sanitization in our analytics program
- Connect audit data with chemical purchase data to see the 'bigger picture'
- Water consumption analysis & red flag indicators imbedded into audit forms, layered with sanitation consumption for insights into potential high risk potential
- Layer health department data onto audit & chemical trends
- Dashboard deployment for headquarters and field leadership for comprehensive management of risk

"This is, by far, the most impressive data analytics program in the industry. Well done."- USA retail client
