

J-Fill® Bottle

Simple for Staff. Reliable for Results.

Designed to make daily cleaning easier, safer, and more consistent

Paired with the **J-Fill® dispensing system**, each bottle supports correct product identification, controlled use, and a smooth workflow for frontline teams – to make cleaning faster to train, easier to follow, and simpler to manage.

Safety

The Spill-Tite™/MC design virtually eliminates spills, leaking or being able to manually dilute concentrate.

The patented J-Fill Educator and tip configurations have the ability to dilute from a range of 1:16 to 1:1024 with precision accuracy that no other company can replicate.

Metering tip in every bottle ensures precise dilution, reduces maintenance and eliminates possibility of tampering with dilution ratios.

Performance

Push a button, or squeeze a trigger and the J-Fill dispensing system will dispense accurate cleaning solutions with no measuring, mixing or mess. It is that easy.

Fill bottles, buckets, sinks and floor care machines remotely or from a central location quickly and accurately.

Number and color-coded labels that are visible through product windows for easy product identification.

Sustainable

Super and Hyper concentrates reduce packaging and solid waste disposal/recycling. One J-Fill bottle at 1:256 will generate 170 gallons of cleaning solution.

Requires significantly less storage, handling and packaging cost per diluted gallon than conventional packaging.

Not only is the J-Fill packaging made from some recycled plastic, but the entire packaging is 100% recyclable

Patented in-cartridge metering for precision accuracy.

Patented leak proof Spill-Tite cartridge.
